PROFILE SUMMARY

Second-year Artificial Intelligence and Machine Learning student who builds responsive websites and AI-powered applications from concept to deployment. Comfortable working across the stack with JavaScript for interactive front-end interfaces and Python for machine learning and automation. Has independently designed and built portfolio-style websites and applied AI/chatbot techniques to real project problems, with a client-first approach to understanding requirements before writing code. Actively expanding practical skills through hands-on projects, technical symposiums, and structured skill-development activities.

TECHNICAL SKILLS

Languages: Python, JavaScript, C

Web Development: HTML, CSS, JavaScript, Responsive Web Design

AI / ML: Machine Learning, AI-Powered Applications, Chatbot Development

Tools & Technologies: Git, GitHub, VS Code, REST APIs

PROJECTS

Research Agent Python, Streamlit, Gemini API

- Built an AI-powered research assistant that automates the process of gathering, analyzing, and summarizing information on user-provided topics using Python, Streamlit, and the Gemini API.
- Delivered a functional tool that generates structured research summaries and reports, helping reduce the time and effort required for manual research.

Personal Finance Chatbot Python, AI, NLP

- Developed an interactive chatbot that assists users with personal finance queries, including budgeting, expense management, savings, and basic financial guidance using AI and NLP techniques.
- Designed an intuitive conversation flow that provides clear, relevant, and step-by-step responses to help users understand and manage their financial queries.

Smart Care AI Python, AI, Machine Learning

- Built an AI-based smart care solution designed to provide accessible care-related information and intelligent recommendations using AI and machine learning techniques.
- Developed a user-friendly system focused on making essential care-related guidance easier to access, understand, and use.

AgriSense UI/UX, Smart Agriculture, AI/ML

- Designed a smart agriculture solution focused on addressing challenges in crop monitoring and agricultural decision-making as part of a Skill Development Cell initiative on Smart City Application UI.
- Developed a functional prototype/UI demonstrating the proposed solution and its potential application in improving smart and technology-driven agricultural practices.

FREELANCE WEB DEVELOPMENT

- Design and build responsive, mobile-friendly websites using HTML, CSS, and JavaScript, from layout through deployment.
- Create portfolio and business-style websites focused on clean UI, fast load times, and clear content structure.
- Integrate AI-powered features (such as chatbots) into web projects, and use Git/GitHub for version control throughout.

EDUCATION

B.E. / B.Tech, Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Sir Isaac Newton College of Engineering and Technology (AUTONOMOUS) • Pappakovil, Nagapattinam

Currently in 2nd Year • Expected Graduation 2029

CERTIFICATIONS & ACTIVITIES

- Participated in SYNTAX 2K26, a National Level Technical Symposium at Sir Isaac Newton College of Engineering and Technology — competed in Paper Presentation and Code Debugging events.
- Selected for the Skill Development Cell project “Develop Smart City Application UI,” focusing on a Smart Agriculture application (AgriSense).

- Completed hands-on activities in AI-based attendance systems, portfolio website development, and technical documentation as part of ongoing skill-building.
